**Will you please let me stay with you? I will do whatever you want.  
Two arms length away, she stood shivering in the summer rain.**

Experience a future where the starlit night signals the end. Companion is a Chinese developed visual novel from Narrator with gorgeous artwork and a poetic romance.

The Companion Star Project is a name from the distant past. With a population growth that showed no sign of slowing down, a small planet was painfully relocated to orbit around the Earth for pioneers to terraform and emigrate.

Those who stayed behind eventually lost control over the companion star after bloody wars and devastating plagues.

Many years passed,  
the companion star, now no longer in orbit, will bring inevitable destruction to Earth.  
Those who know about the pending doom built shelters,  
but they did not want the surface world to descend into chaos, so they took the secret with them underground.

And now,  
a man who knows about the end and decides to live lavishly

## Chapter 01

Accompanying the darkness were the ever-present stars, beloved subjects for sleepless tale-weavers.

The skies in the East would then pale, and a new day would begin.

## Chapter 01

A suit-clad office worker ran to escape the rain, his suitcase held overhead in a desperate bid to stay dry. Some teenagers passed around a basketball and roughhoused with each other, enjoying themselves despite the weather.

Colorful blossoms of umbrellas moved forward in an endless, rhythmic flow. ▼

**In general, Companion's storyline is not bad, but still need polish.**

**It is exactly a VN, without any selection you could make in its plots. And it was like a fiction, but the author emphatically described the events which usually happen in daily life and revealed things you may not notice at all. I really want to complain that why the the text is Eng version, but it was dubbed in Chinese... It is so weird when a person whose major language is english, but need listen to a bunch of voices he can't understand even a little at all. As for the Chinese readers including me, there are some English skills you should have for reading that story. The experience was not good.**

**The CGs are excellent, and there are even some details in the CGs that you could find. I can imagine how the author pay attention to the materials-collecting. It is also interesting for me to look for those details when I'm playing the VN. The text system is unique. Half of the screen is covered by the CG, another has the text on it. I'm not recommend the author to do so since it made me sleepy when I'm reading.**

**The BGMs are so nice! I'd love to added it into my wishlist if the soundtrack could be added. My favorite one was going on when Airi was opening the door of the car, leaving for her own home.**

**I will update more details about the plot if I could come back...**

i hope to see more from the makers .. Solid, short VN. Translation's a little rough, but certainly not unreadable. Story's a little daring, and does good things with that. I would have liked the story to end a little differently, but I have to admit their ending fits pretty well.

Definitely recommend.. Ah... Where to start?

From amazing music to gorgeous CGs, this game is a must get for those searching something to do when bored.

Companion, a kinetic visual novel, will make you go through every facial expression you could ever make. With a bitter sweet ending, the story itself is very well written (maybe slight translation mistakes but who cares!) and almost brought me in tears multiple times. It's the first time I played a VN voiced in mandarin so the voice threw me a bit off at first, but you get used to it (it gets cuter as you play through). I'm a little bit dissapointed though because some CGs shown in the trailer don't appear in the game, but all in all, like it's name, it will make you crave for a companion if you are a lonely single f\*cktard like i am.

Pros:

-CGs 10/10

-Music 10/10 I can't find it anywhere on youtube :( the soundtracks are too good.

-Story 9/10

Cons:

-Translation mistakes (as long as you get the story, it shouldn't bother/hinder you)

-Short for it's price (Get it on discount!!!). This is an interesting little kinetic novel. The main character is a scientist who... discovered that a project from the past is about to come crashing down in rather... apocalyptic fashion. While the novel does tell of why people on Earth cannot stop the Companion from crashing to Earth in a ELE (look up Deep Impact for definition), it does not say why those on Companion can't help...

Anyway, the story begins like Pretty Woman. As in, you meet a \u2665\u2665\u2665\u2665\u2665\prostitute\call girl, who... captures your heart. And in the end... will you choose to save yourself? Or stay with her?

It appears to be a port of a Chinese VN, so some of the translations are not... completely done well, but the story does shine through. Note, I did get this on discount, and it might be a good idea to do so, too.

Also, this game is in line to get Trading Cards, depending upon how much demand is voiced on their discussion board...
