Wakelets Cupcake Mini. wakelets.Q: Substring with regular expression in C# I need to replace a text with the new substring but the regex is not working I want to replace " \r - \t. " I tried using the following regex but it didn't work `Regex rgx = new Regex(@"[\r -]{1}", RegexOptions.Compiled);` A: The correct syntax is: `@"[\r -]{1,}"` That is, specify a minimum number of characters between the square brackets. Also, `{1}` specifies that it must occur only once. Note that if you intend to match exactly those characters, then use the following syntax: `\r -]{0,}"`

```
package com.example.easyadapterdemo.activity;
import android.os.Bundle;
import android.support.v7.app.ActionBarActivity;
import android.view.MenuItem;
import com.example.easyadapterdemo.R;
public class ActionBarActivity extends ActionBarActivity {
    @Override protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_actionbar);
    }
    public boolean onOptionsItemSelected(MenuItem item) {
        switch (item.getItemId()) {
            case android.R.id.home:
                this.finish();
                return true;
        }
    }
}
```
